With only 5 and 9 pound weights how can he put his twenty pounds of sugar into packages of 2 pounds each?

SOLUTION TO MAN WITH THE HOE PUZZLE. There are twelve rows, and Hobbs and Snobbs each plant and cover six rows. Hobbs plants a row in twenty minutes and covers it in sixty minutes. Snobbs plants in forty minutes and covers in the same time. As each earns the same amount each must do half the planting and half of the covering, as there is no way to determine the relative values of the two kinds of work. Each must therefore take the same time to plant and cover a row. As Snobbs takes twenty minutes more to cover than Hobbs takes to plant, Hobbs must take twenty minutes more to cover than Snobbs takes to plant, but Hobbs' time for covering is half as much again as Snobbs' for planting, so that Snobbs' time for planting is forty minutes per row.
